

Thermocouple for IR500 Rework System - Ersas 0IR4510-01

Item no. ER-0IR4510-01 **Manufacturer** Ersas

Manufacturer no. 0IR4510-01

Thermocouple (temperature sensor) replacement part for the ERSA IR500 infrared rework system. It captures the temperature during the desoldering and reflow process for precise, repeatable process control.

TECHNICAL DATA

Article authenticity	Original product
Condition of article	New
Country of Manufacture	Germany
Weight	0.1 kg

DESCRIPTION

The **0IR4510-01 thermocouple** is a replacement temperature sensor for the ERSA IR500 infrared rework system. It measures the temperature at the component or PCB and feeds the actual values back to the system for precise, repeatable control of desoldering and reflow profiles.

Technical data

Type	Thermocouple / temperature sensor
Use	Replacement part
Compatibility	ERSA IR500 infrared rework system
Manufacturer article number	0IR4510-01
