

MICROMOT Steel Collets 6 pcs 1.0 to 3.2 mm with holder - Proxxon 28940

Item no. PX-28940

Manufacturer Proxxon

EAN 4006274289406

This set holds six hardened MICROMOT steel collets in sizes 1.0 / 1.5 / 2.0 / 2.4 / 3.0 and 3.2 mm, complete with clamping nut and storage holder. Hardening gives them high, consistent flexibility and keeps their accuracy even after regular use. They fit all handheld MICROMOT machines except the GG 12 engraver.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Germany
Weight	0.037 kg

DESCRIPTION

This collet set equips handheld MICROMOT machines for precise tool changes across the common shank range. It contains one each of 1.0, 1.5, 2.0, 2.4, 3.0 and 3.2 mm steel collets with a clamping nut and holder for storage.

- **Hardened steel** for high, consistent flexibility.
- **Triple-slit design**, harder to manufacture than four-slit collets but offering a better load-bearing surface and central grip even on thin shanks.
- **Lasting accuracy** even after regular use, unlike unhardened collets of brass or aluminium.
- **Storage holder** keeps the set sorted and to hand.

TECHNICAL DATA

- Sizes: 1.0 / 1.5 / 2.0 / 2.4 / 3.0 / 3.2 mm
- Contents: 6 steel collets with clamping nut and holder
- Material: hardened steel, triple-slit
