DESCRIPTION

This complete kit lets you start engraving glass without hunting for accessories. The GG 12 engraving tool with its quiet special DC motor weighs just 50g and sits comfortably in the hand.

- **Full set of bits:** 1.0 and 1.8mm diamond grinding bits with spherical head for scribing and line work, silicon carbide grinding bits in conical and bullet shape for frosting glass, plus corundum grinding bits in ball and cylinder shape for grinding and engraving.
- **Trial glass, motifs and instruction booklet** for an immediate start.
- **Bit holder** for tidy storage of the rotating bits.
- **0.5A mains adapter for 230V** included.
- Housing of glass-fibre reinforced polyamide, everything stored securely in an attractive plastic case.
