

Soldering tip chisel 2,4 mm for Quick 202D ESD - Quick 303-2.4D

Item no. QCK-303-2.4D

Manufacturer Quick

EAN 4250078322733

Original Quick 303-series long-life soldering tip, chisel, 2,4 mm, for the Quick 202D ESD soldering station. Iron-coated electrolytic copper with chrome plating for long service life, and an external thermocouple that senses temperature right at the tip. Suitable for leaded and lead-free soldering, RoHS compliant.

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
Country of Manufacture	China
HS-Code	85159080900
Weight	0.1 kg

STANDARDS & COMPLIANCE

ESD safe

DESCRIPTION

The **Quick 303-2.4D** is an original 303-series long-life soldering tip in a **chisel 2,4 mm** geometry for the industrial-grade Quick 202D ESD soldering station. It is manufactured to tight tolerances for precise, repeatable joints.

BENEFITS

- Long service life thanks to iron-coated electrolytic copper with additional chrome plating
- External thermocouple senses temperature directly at the tip for a realistic reading of the joint temperature
- Fast, accurate reheating through the 202D closed-loop PID control, keeping temperature swings and thermal stress on components to a minimum
- Suitable for leaded and lead-free soldering

TECHNICAL DATA

Tip series	303
Shape	chisel
Version	straight

Tip diameter / width	2.40 mm
RoHS compliant	Yes

COMPATIBILITY

Fits the Quick 202D ESD soldering station. Interchangeable with other shapes and sizes within the 303 series, so the right geometry is available for every task.

Compliance: RoHS, ESD-safe. Origin: China.
