

Soldering tip needle 0,2 mm for Quick 202D ESD - Quick 303-I

Item no.	QCK-303-I	Manufacturer	Quick
Manufacturer no.	303-I	EAN	4250078322689

Original Quick 303-series long-life soldering tip, needle point, 0,2 mm, for the Quick 202D ESD soldering station. Iron-coated electrolytic copper with chrome plating for long service life, and an external thermocouple that senses temperature right at the tip. Suitable for leaded and lead-free soldering, RoHS compliant.

TECHNICAL DATA

Article authenticity	Original product
Condition of article	New
Country of Manufacture	China
Execution	ESD (antistatic)
HS-Code	85159080900
Weight	0.1 kg

STANDARDS & COMPLIANCE

ESD safe

DESCRIPTION

The **Quick 303-I** is an original 303-series long-life soldering tip in a **needle point 0,2 mm** geometry for the industrial-grade Quick 202D ESD soldering station. It is manufactured to tight tolerances for precise, repeatable joints.

Benefits

- Long service life thanks to iron-coated electrolytic copper with additional chrome plating
- External thermocouple senses temperature directly at the tip for a realistic reading of the joint temperature
- Fast, accurate reheating through the 202D closed-loop PID control, keeping temperature swings and thermal stress on components to a minimum
- Suitable for leaded and lead-free soldering

Technical data

Tip series	303
Shape	needle point
Version	straight
Tip diameter / width	0.20 mm
RoHS compliant	Yes

Compatibility

Fits the Quick 202D ESD soldering station. Interchangeable with other shapes and sizes within the 303 series, so the right geometry is available for every task.

Compliance: RoHS, ESD-safe. Origin: China.
