

ESD soldering tip knife 1 mm for 3103 / 3104 / TS1100 - Quick 960-1C

Item no. QCK-960-1C

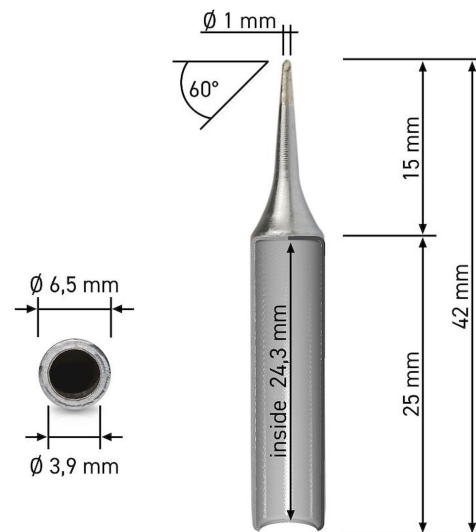

Manufacturer Quick

EAN 4250078320951

Original Quick series 960 long-life soldering tip with beveled geometry and 1 mm diameter, made for the Quick 3103, 3104 and TS1100 stations. The internally heated cartridge transfers the heat of the high-frequency element precisely and evenly for clean joints. Suited to tinning and reworking pads and pins. Lead-free capable and RoHS compliant.

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
Certification	IEC 61340-5-1
Country of Manufacture	China
HS-Code	85159080900
Weight	0.1 kg

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

The original Quick 960-1C long-life soldering tip is an internally heated series 960 cartridge with beveled geometry and a 1 mm diameter, built for the Quick 3103, 3104 and TS1100 soldering stations. The internal heater and the station's high-frequency electronics deliver fast, even heat recovery for repeatable joints.

BENEFITS

- Precise, uniform soldering temperature from the internally heated body and high-frequency element
- Beveled geometry at 1 mm for tinning and reworking pads and pins
- Tight manufacturing tolerances for durable, well-wetting tips

TECHNICAL DATA

Style	straight
Tip shape	bevel 60°
Diameter	1 mm
Tip series	960

APPLICATIONS

Suited to tinning and reworking pads and pins at the ESD workstation, in electronics manufacturing, repair and laboratory work.

COMPATIBILITY AND SCOPE OF DELIVERY

Fits the Quick Quick 3103, 3104 and TS1100 soldering stations (tip series 960). Scope of delivery: 1 long-life soldering tip 960-1C.

Lead-free capable, RoHS compliant, ESD-safe to IEC 61340-5-1. Made in China.
