DESCRIPTION

The precision machine vice PRIMUS 100 is the larger model in the PRIMUS range and clamps work pieces securely for drilling and milling. The special cast iron body has CNC-machined guides, and the spindles with rolled trapezoid thread stay smooth even under high axial load.

- Special cast iron body with CNC-machined guides
- Interchangeable gripping jaws
- Flat-milled working surface
- Spindles with rolled trapezoid thread for ease of operation even under high axial load
- V-slots for horizontal and vertical clamping of round stock, slot for flat stock

TECHNICAL DATA

- Jaw width: 100 mm
- Jaw opening: 75 mm
- Long slot centre to centre: 135 mm
- Long slots: 105 x 15 mm
- Weight: 5.0 kg

Ideal for securely clamping larger work pieces on drill and mill tables.
