

SlimLine Combination Spanner 17 mm - Proxxon 23917

Item no. PX-23917

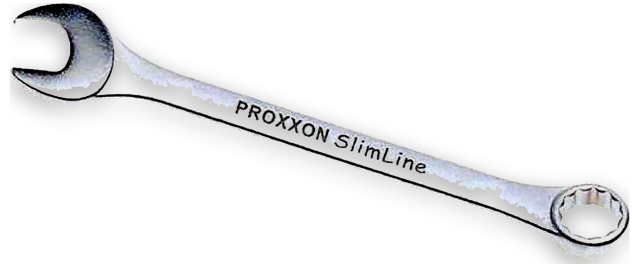

Manufacturer Proxxon

EAN 4006274239173

Single SlimLine combination spanner with size 17 mm, made to DIN 3113 and ISO 3318. The 15-degree offset ring and slim polished head reach torque values well above DIN/ISO.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Germany
Weight	0.125 kg

STANDARDS & COMPLIANCE

ISO 3318 DIN 3113

DESCRIPTION

The 17 mm combination spanner from the Proxxon SlimLine range is carefully hardened and tempered and made to DIN 3113 and ISO 3318. The ring head is offset by 15 degrees so it sits well even over recessed bolts.

Benefits

- Combines a ring end and an open end in one spanner
- Ring head offset 15 degrees for easier access
- Slim, polished heads with torque well above DIN/ISO
- Thorough surface treatment (double nickel-plated, single chrome-plated) with a smooth finish
- Durable laser-inscribed size, each piece calibrated and finally checked

TECHNICAL DATA

- Size: 17 mm
- Length: 210 mm
- Ring head offset 15 degrees
- Standard: DIN 3113, ISO 3318
- Finish: double nickel-plated, single chrome-plated

Applications

To add to or replace a single spanner in the workshop, industry and model making. Matches the 12-piece SlimLine set.
