

MicroSpeeder ratchet ring spanner 21 mm, 72 teeth - Proxxon 23270

Item no. PX-23270

Manufacturer Proxxon

EAN 4006274232709

Slim MicroSpeeder ratchet ring spanner with 21 mm width across flats. The 72-tooth inner ring engages from just 5 degrees of lever travel, so you keep working in tight spaces without ever repositioning the spanner.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Germany
Weight	0.358 kg

DESCRIPTION

The standard MicroSpeeder is a straight, slim ratchet ring spanner with a 21 mm width across flats. Its 72-tooth inner ring, made of high alloy special steel, drives the fastener from just 5 degrees of lever travel, letting you work quickly even on hard to reach bolts.

- **Fine ratchet gearing:** 72 teeth, drive from 5 degrees of lever travel, ratchet action on the ring end.
- **High load capacity:** transmittable torque well above DIN/ISO, fully encapsulated drive.
- **Durable shaft:** CrV steel, double nickel-plated and single matt chrome-plated for lasting surface protection.
- **Easy to read:** width across flats applied permanently by laser marking.
- **Slim head:** very compact outer dimensions for the size, ideal for reaching into tight spaces.

TECHNICAL DATA

- Width across flats: 21 mm
- Gearing: 72 teeth
- Drive from: 5 degrees lever travel
- Shaft material: CrV steel, nickel and matt chrome-plated

Proven for removing and refitting engines, on automatic transmissions, rear axles and wherever conventional spanners can no longer be repositioned. Suitable for full professional use.
