

MicroSpeeder ratchet spanner 21 mm with reverse lever - Proxxon 23143

Item no. PX-23143

Manufacturer Proxxon

EAN 4006274231436

MicroSpeeder ratchet spanner, 21 mm, with a 15-degree offset head and a reverse lever for clockwise and anticlockwise work. Ideal for fastening on flat surfaces without repositioning the spanner.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Germany
Weight	0.369 kg

DESCRIPTION

This MicroSpeeder ratchet spanner with a 21 mm width across flats has a head offset by 15 degrees and a reverse lever for clockwise and anticlockwise work. As the offset head cannot be turned over, the lever changes the direction of drive, so you fasten quickly on flat surfaces without repositioning the spanner.

- **Reverse lever:** clockwise and anticlockwise drive via the switch lever.
- **15-degree offset head:** ideal for working on flat surfaces.
- **Fine gearing:** 72-tooth inner ring, drive from 5 degrees of lever travel, torque well above DIN/ISO.
- **Durable shaft:** CrV steel, double nickel-plated and single matt chrome-plated.
- **Easy to read:** width across flats applied by laser marking, very slim head.

TECHNICAL DATA

- Width across flats: 21 mm
- Gearing: 72 teeth
- Drive from: 5 degrees lever travel
- Head: 15-degree offset, with reverse lever
- Shaft material: CrV steel, nickel and matt chrome-plated

Proven for removing and refitting engines, on automatic transmissions and rear axles. Suitable for full professional use.
