

MicroSpeeder ratchet spanner 10 mm with self-locking hinge - Proxxon 23047

Item no. PX-23047

Manufacturer Proxxon

EAN 4006274230477

MicroSpeeder ratchet spanner, 10 mm, with a self-locking hinge. The hinge holds its set position even after more than 10,000 movements, so it reaches tight, awkward fasteners with full flexibility.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Germany
Weight	0.072 kg

DESCRIPTION

The MicroSpeeder with self-locking hinge and a 10 mm width across flats combines fine ratchet gearing with full flexibility. The self-locking action of the hinge remains effective even after more than 10,000 movements, so the spanner holds its set position reliably when access is tight and awkward.

- **Self-locking hinge:** holds its position even after more than 10,000 movements, unmatched in tight situations.
- **Fine gearing:** 72-tooth inner ring, drive from 5 degrees of lever travel, torque well above DIN/ISO.
- **Durable shaft:** CrV steel, double nickel-plated and single matt chrome-plated.
- **Extra slim head:** very compact outer dimensions for the size.
- **Easy to read:** width across flats applied by laser marking.

TECHNICAL DATA

- Width across flats: 10 mm
- Gearing: 72 teeth
- Drive from: 5 degrees lever travel
- Hinge: self-locking
- Shaft material: CrV steel, nickel and matt chrome-plated

Proven for removing and refitting engines, on automatic transmissions and rear axles. Suitable for

full professional use.
