

Doppelring-MicroSpeeder SW 17 x 19 mm - Proxxon 23250

Item no. PX-23250

Manufacturer Proxxon

EAN 4006274232501

Double ring ratchet spanner with a ratcheting head at each end, sizes 17 x 19 mm. The 72-tooth inner gear drives from just 5° of lever travel, ideal for engine work, automatic transmissions and rear axles in tight spaces.

TECHNICAL DATA

Ausführungsklasse	TEC
Country of Manufacture	Germany
Weight	0.231 kg

DESCRIPTION

The double ring MicroSpeeder is a slim ratcheting ring spanner with two sizes in a straight design, ideal for reaching into confined spaces. This spanner covers sizes 17 x 19 mm.

- **Ratcheting from 5° of lever travel:** the 72-tooth inner gear of high-alloy special steel proves itself where conventional spanners can no longer be repositioned.
- **Slim head and minimal outer dimensions:** the encapsulated gear design allows an extremely compact build.
- **CrV steel shaft** with double nickel plating and a matt chrome finish.
- **Laser marking** keeps the sizes clearly legible and permanent.

TECHNICAL DATA

- Sizes: 17 x 19 mm
- Drive: 72-tooth inner gear, from 5° lever travel
- Shaft material: CrV steel, twice nickel plated, once matt chromed
- Length: 294 mm

Proven in automotive use for engine removal, automatic transmissions and rear axle work. Suitable for full professional use.
