

L-Handle Screwdriver Hex HX 10 mm, Short/Long - Proxxon 22418

Item no. PX-22418

Manufacturer Proxxon

EAN 4006274224186

L-handle screwdriver for hex screws of size HX 10 mm with two blades in one tool. The short blade carries a sturdy standard HX, the long blade an HX ball head for working angles up to 25 degrees. The ergonomic asymmetrical two-component handle reduces pressure marks under high force.

TECHNICAL DATA

 Ausführungsklasse **TEC**

 Country of Manufacture **Germany**

 Weight **0.343 kg**

DESCRIPTION

The Proxxon L-handle screwdriver applies high torque to hex screws of size HX 10 mm.

- **Two blades in one tool:** short side with sturdy standard HX, long side with HX ball head for working angles up to 25 degrees.
- **L-shape as a lever:** when using the short blade, the longer shank acts as a lever for extreme torque.
- **Ergonomic handle:** asymmetrical two-component shape with soft zone reduces pressure marks in continuous use.
- **Special steel:** continuously hardened and stress-relieved for balanced torsional rigidity and toughness.

TECHNICAL DATA

- Profile: hex HX 10 mm
- Long blade: 215 mm
- Blade of chrome-silicon-manganese-molybdenum special steel, matte chrome plated
- Laser-marked size on shaft and handle, transverse hole for hanging up

For machines, motors and assembly work with hex screws.
