

Anti-static flat brush, 140 mm, conductive handle - Kinetronics SW-140

Item no. SW - 140**Manufacturer Kinetronics**

Anti-static cleaning brush, 140 mm wide, with soft natural hair and conductive synthetic fibers. The conductive plastic handle dissipates static charges and stops dust attraction. For large-area cleaning of optics and electronics.

TECHNICAL DATA

Ausführungsklasse **ESD (antistatic)**

ESD equipment **ESD-Bürste**

Sales unit **1 Stück**

Weight **0.1 kg**

Width **140**

DESCRIPTION

The Kinetronics StaticWisk SW-140 lifts dust and fine particles from sensitive surfaces without charging them. The wide 140 mm face cleans large optics, scanners, displays and electronic assemblies quickly.

BENEFITS

- blend of soft natural hair and conductive synthetic fibers binds dust instead of moving it around
- conductive plastic handle bleeds off charges and prevents re-charging
- for extreme, recurring charges also available as variant SW-141 with grounding cable
- anti-static performance survives washing with a mild shampoo

TECHNICAL DATA

- brush width: 140 mm
- bristles: natural hair / synthetic fiber, conductive
- handle: conductive plastic
- maximum operating temperature: 65 °C
- scope of delivery: 1 StaticWisk cleaning brush

APPLICATIONS

Cleaning optics, scanners, displays, circuit boards and plastic parts in laboratory, photography and

electronics manufacturing.

CARE

When soiled, wash with a mild shampoo, comb the fibers and let them dry flat overnight.
