

Anti-static flat brush, 280 mm, conductive handle - Kinetronics SW-280

Item no. SW - 280

Manufacturer Kinetronics

Anti-static cleaning brush, 280 mm wide, with soft natural hair and conductive synthetic fibers. The conductive plastic handle dissipates static charges and stops dust attraction. For very large-area cleaning of optics and electronics.

TECHNICAL DATA

Ausführungsklasse **ESD (antistatic)**ESD equipment **ESD-Bürste**Sales unit **1 Stück**Weight **0.1 kg**Width **280**

DESCRIPTION

The Kinetronics StaticWisk SW-280 lifts dust and fine particles from sensitive surfaces without charging them. The very wide 280 mm face cleans large-format optics, scanners, displays and film in just a few strokes.

BENEFITS

- blend of soft natural hair and conductive synthetic fibers binds dust instead of moving it around
- conductive plastic handle bleeds off charges and prevents re-charging
- for extreme, recurring charges also available as variant SW-281 with grounding cable
- anti-static performance survives washing with a mild shampoo

TECHNICAL DATA

- brush width: 280 mm
- bristles: natural hair / synthetic fiber, conductive
- handle: conductive plastic
- maximum operating temperature: 65 °C
- scope of delivery: 1 StaticWisk cleaning brush

APPLICATIONS

Cleaning large-format optics, scanners, displays, film and plastic parts in laboratory, photography

and electronics manufacturing.

CARE

When soiled, wash with a mild shampoo, comb the fibers and let them dry flat overnight.
