## DESCRIPTION

## OVERVIEW

The Hakko 96-1-2 is a replacement solder pot designed for the discontinued Hakko 96 soldering system. This large-capacity stainless steel bath maintains consistent solder temperature during continuous soldering operations and includes an overflow prevention rim for enhanced safety.

## KEY FEATURES

- Large-capacity solder bath for extended operation
- Stainless steel construction for durability and corrosion resistance
- Overflow prevention rim around bath perimeter
- Raised rim design enhances soldering and desoldering efficiency
- Heavy-duty components for long service life
- Waste collector for improved operating ease

## TECHNICAL SPECIFICATIONS

|                   |                                 |
|-------------------|---------------------------------|
| Dimension (L×W×H) | 70×70×64 mm                     |
| Material          | Stainless Steel                 |
| Compatibility     | Hakko 96 (Discontinued 2023/03) |

|                       |                                              |
|-----------------------|----------------------------------------------|
| <b>Product Status</b> | Discontinued – Service parts still available |
|-----------------------|----------------------------------------------|

## APPLICATIONS

Replacement component for Hakko 96 soldering pot systems. Suitable for lead and lead-free solder applications in electronics assembly and repair work.

## NOTES

The parent Hakko 96 soldering pot was discontinued in March 2023 and succeeded by the Hakko FX-300. No common parts are available between the two models. This replacement pot is still available as a service part for existing Hakko 96 systems.
