

Nozzle Spacer Micro Soldering Iron - Hakko A 5070

Item no. HK-A-5070Manufacturer HakkoEAN 4962615060304

Precision nozzle spacer designed for micro soldering iron applications. Ensures consistent spacing and alignment during fine soldering work on miniature components and circuit boards.

TECHNICAL DATA

Country of Manufacture	Japan
HS-Code	85159080
Weight	0.1 kg

DESCRIPTION

OVERVIEW

The Hakko A 5070 is a specialized nozzle spacer designed for use with micro soldering irons. This precision tool maintains consistent nozzle spacing and alignment, essential for accurate soldering of miniature components and fine-pitch circuit board work.

KEY FEATURES

- Precision-engineered spacing tool for micro soldering applications
- Ensures consistent nozzle alignment and positioning
- Designed for professional electronics assembly and repair
- Compatible with Hakko micro soldering iron systems
- Durable construction for repeated use

TECHNICAL SPECIFICATIONS

Model	A 5070
Product Type	Nozzle Spacer
Application	Micro soldering irons
Country of Origin	Japan

APPLICATIONS

Ideal for precision soldering work on miniature components, fine-pitch circuit boards, and delicate electronics requiring accurate nozzle positioning and spacing control.
