

Soldering Tip Sleeve T18 - Hakko B 3730

Item no. HK-B-3730	Manufacturer Hakko	EAN 4962615039317
--------------------	--------------------	-------------------

Replacement tip sleeve with lock nut designed for Hakko T18 soldering tips. Compatible with FX600 soldering stations or for upgrading FX601 models to T18 tip compatibility.

TECHNICAL DATA

Country of Manufacture	Japan
HS-Code	85159080
Weight	0.1 kg

DESCRIPTION

OVERVIEW

The Hakko B 3730 is a precision soldering tip sleeve assembly featuring an integrated lock nut, engineered for use with Hakko T18 soldering tips. This replacement component enables compatibility with FX600 soldering stations and allows FX601 models to be retrofitted for T18 tip operation.

KEY FEATURES

- Designed specifically for Hakko T18 soldering tips
- Includes integrated lock nut for secure tip retention
- Replacement part for FX600 soldering stations
- Enables FX601 upgrade to T18 tip compatibility
- Precision-engineered for reliable thermal transfer
- Japanese manufacturing quality

TECHNICAL SPECIFICATIONS

Tip Compatibility	Hakko T18
Compatible Stations	FX600, FX601
Component Type	Tip Sleeve with Lock Nut

Country of Origin	Japan
-------------------	-------

APPLICATIONS

Ideal for maintenance and repair of Hakko FX600 soldering stations, or as an upgrade component for FX601 models requiring T18 tip compatibility. Essential replacement part for users requiring tip sleeve replacement due to wear or damage.
