

Nitrogen Nozzle G for T39 Tips - Hakko B 5296

Item no. HK-B-5296	Manufacturer Hakko	EAN 4962615059841
--------------------	--------------------	-------------------

Nitrogen nozzle G designed for use with Hakko T39 N2-soldering tips. Enables precision nitrogen gas delivery during lead-free soldering operations. Compatible with nitrogen-capable soldering systems.

TECHNICAL DATA

Country of Manufacture	Japan
HS-Code	85159080
Weight	0.1 kg

DESCRIPTION

OVERVIEW

The Hakko B 5296 is a nitrogen nozzle G specifically engineered for use with Hakko T39 N2-soldering tips. This precision accessory enables controlled nitrogen gas delivery during soldering operations, particularly beneficial for lead-free solder applications where nitrogen atmosphere reduces oxidation and improves joint quality.

KEY FEATURES

- Designed for T39 N2-soldering tips
- Precision nitrogen gas delivery
- Reduces solder oxidation during lead-free soldering
- Improves solder wetting and joint reliability
- Professional-grade construction
- Compatible with nitrogen-equipped soldering systems

TECHNICAL SPECIFICATIONS

Nozzle Type	Nitrogen Nozzle G
Tip Compatibility	Hakko T39 N2-soldering tips
Country of Origin	Japan

APPLICATIONS

Ideal for lead-free soldering operations, rework applications, and precision assembly work where nitrogen atmosphere protection is required to minimize oxidation and ensure superior solder joint quality.
