

Hot Air Station Fan Module - Hakko B 5369

Item no. HK-B-5369	Manufacturer Hakko	EAN 4962615043499
--------------------	--------------------	-------------------

Genuine replacement fan module for the Hakko FR 810 hot air rework station. Maintains consistent airflow performance for reliable component heating and desoldering operations.

TECHNICAL DATA

Country of Manufacture	Japan
HS-Code	85159080
Weight	0.1 kg

DESCRIPTION

OVERVIEW

The Hakko B 5369 is a genuine replacement fan module designed specifically for the Hakko FR 810 hot air rework station. This component is essential for maintaining proper airflow and thermal performance during soldering and desoldering operations.

KEY FEATURES

- Original equipment manufacturer (OEM) part for Hakko FR 810
- Ensures consistent and reliable airflow performance
- Direct replacement for worn or damaged fan units
- Maintains thermal stability during extended use
- Japanese engineering and quality standards

TECHNICAL SPECIFICATIONS

Compatibility	Hakko FR 810 Hot Air Station
Part Type	Fan Module
Country of Origin	Japan

APPLICATIONS

Ideal for maintenance and repair of Hakko FR 810 hot air rework stations. Replace when airflow decreases or fan performance degrades to restore station functionality.
