

Active Soldering Tip SOP 8L - Hakko T51-L8

Item no. HK-T51-L8	Manufacturer Hakko	EAN 4962615060540
--------------------	--------------------	-------------------

Active soldering tips in SOP 8L format designed for the Hakko FX-9705 precision soldering tweezers. Pack contains 2 replacement tips. Ideal for fine-pitch component soldering and rework applications.

TECHNICAL DATA

Country of Manufacture	Japan
HS-Code	85159080
Weight	0.02 kg

DESCRIPTION

OVERVIEW

The Hakko T51-L8 is a set of two active soldering tips in SOP 8L format, specifically engineered for use with the Hakko FX-9705 precision soldering tweezers. These tips deliver consistent heat transfer and are ideal for soldering small-outline package components and fine-pitch applications in electronics assembly and rework.

KEY FEATURES

- SOP 8L format geometry for precise component alignment
- Active heating element for reliable thermal performance
- Compatible with Hakko FX-9705 tweezers system
- Pack of 2 replacement tips
- Professional-grade construction for extended service life
- ESD-safe design for sensitive component protection

TECHNICAL SPECIFICATIONS

Tip Format	SOP 8L
Compatibility	Hakko FX-9705 Soldering Tweezers
Quantity per Pack	2 tips

Tip Type	Active heating
ESD Safe	Yes
Country of Origin	Japan

APPLICATIONS

The T51-L8 tips are ideal for soldering and reworking small-outline integrated circuits, fine-pitch connectors, and other miniature components in consumer electronics, telecommunications, medical devices, and industrial control systems.

SCOPE OF DELIVERY

- 2 × Active soldering tips SOP 8L format
