

ESD hand brush conductive, bristle area 40 x 110 mm, bristles 22 mm

Item no. EP1201013

Manufacturer A1-ESD

Conductive ESD hand brush with black conductive bristles for the EPA. Bristle area 40 x 110 mm, bristles 22 mm, through-resistance approx. 10 to the 5 Ohm.

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
Colour	Black
Norm	IEC 61340-5-1
Sales unit	1 Stück
Weight	0.1 kg

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

This conductive ESD hand brush removes dust, dirt and loose particles from workstations and assemblies in the EPA without building up electrostatic charge. The compact bristle area suits targeted cleaning.

BENEFITS

- Conductive black bristles drain charges safely
- Through-resistance of about 10 to the 5 Ohm
- Bristle area 40 x 110 mm with 22 mm bristle length

TECHNICAL DATA

- Bristle area: 40 x 110 mm
- Bristle length: 22 mm
- Colour: black
- Material: conductive nylon (bristles)
- Through-resistance: approx. 10 to the 5 Ohm
- Selling unit: 1 piece

APPLICATION

For dry cleaning of work surfaces, circuit boards and ESD-sensitive components.

STANDARDS AND COMPLIANCE

Supports operation of an EPA per IEC 61340-5-1.
