Weight

0.1 kg

STANDARDS & COMPLIANCE

ESD safe

DESCRIPTION

Cleaning with isopropanol at an ESD bench means small amounts, taken often, and never from an open container. The green dispensing bottle with 180 ml and an Isopropanol marking solves that through its One Touch head. A press lifts the fluid into the dish on top, the wipe picks it up from there and the rest of the content stays closed.

BENEFITS

- One Touch head, fluid is taken with one hand and without unscrewing the cap.
- 180 ml fill, enough for a shift and still no open supply on the work surface.
- Isopropanol marking, the intended content is named on the bottle.
- Green body, at benches holding several media the colour code guides the hand to the right bottle.
- Listed as an ESD liquid container of the durAstatic line and intended for use inside the EPA.
- Empty weight of 0.1 kg, minimum order of one piece.

Version	One Touch dispensing bottle
Fill volume	180 ml
Marking	Isopropanol
Colour	Green
Weight	0.1 kg
Minimum order	1 piece
eCl@ss	20070200
UNSPSC	24125000

APPLICATION

Typical work covers the removal of flux residues after soldering, the cleaning of assemblies before test and commissioning, and the upkeep of bench mats, hand tools and test adapters. As only the dish is filled, a small amount reaches the outside at a time. The series is also offered in other colours.
