

ESD storage box open, conductive

Item no. EP0706003

Manufacturer A1-ESD

Open storage box in corrugated board conductively coated on both sides. Bleeder layer 10^5 to 10^6 Ohm, ESD protection to IEC 61340-5-1, for storage and transport of electronic parts.

TECHNICAL DATA

Ausführungsklasse **ESD (antistatic)**Colour **Black**HS-Code **48191000**Weight **0.1 kg**

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

Open storage box in conductive corrugated board for ESD-safe storage and transport of electronic components. The open design gives fast access, the box is stackable and saves space in the warehouse and at the workbench.

BENEFITS

- Conductively coated on both sides, bleeder layer 10^5 to 10^6 Ohm
- Open design for fast access, stackable
- Water- and scratch-resistant outer coating
- ESD protection to IEC 61340-5-1

TECHNICAL DATA

- Design: open, stackable
- Material: conductive corrugated board, black
- Bleeder layer: 10^5 to 10^6 Ohm
- ESD-safe to IEC 61340-5-1

For ESD-safe storage, order picking and in-house transport of electronic assemblies.
