

Permanent toe grounder for personnel grounding, black - A1-ESD EP0104013

Item no. EP0104013

Manufacturer A1-ESD

The black permanent toe grounder creates a dissipative connection to ground via the front of the shoe. Static charges from the person are dissipated safely, protecting sensitive components.

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
Colour	Black
Norm	IEC 61340-5-1
Sales unit	1 Stück
Weight	0.1 kg

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

The permanent toe grounder provides reliable personnel grounding via the front of the shoe and complements or replaces the classic heel grounder. It dissipates static charges in a controlled way to the conductive ESD floor.

BENEFITS

- Grounding via the front (toe) area of the shoe
- Contact for dissipative floor coverings
- Easy to fit for everyday use

TECHNICAL SPECIFICATIONS

- Type: toe grounder for personnel grounding
- Colour: black

APPLICATIONS

The toe grounder is used in ESD protected areas of electronics manufacturing, assembly and test,

and in cleanrooms with dissipative flooring.

STANDARDS AND COMPLIANCE

For use in ESD protected areas to IEC 61340-5-1.
