

Dissipative PE Hand Stretch Film, Pink-Transparent, for Hand Tool EP0703022 - A1-ESD EP0703037

Item no. EP0703037

Manufacturer A1-ESD

Dissipative PE hand stretch film in pink-transparent with high elongation at break and high mechanical strength. For securing cartons, load carriers and pallets inside the ESD protected area, fitting the EP0703022 hand wrapping tool.

TECHNICAL DATA

Weight 0.1 kg

STANDARDS & COMPLIANCE

ESD safe

DESCRIPTION

Wrapping assemblies by hand at the packing station needs a film that stretches far without tearing and that does not carry a critical charge into the ESD protected area. This PE hand stretch film is dissipative and fits the EP0703022 hand wrapping tool.

BENEFITS

- Dissipative specification, therefore intended for wrapping inside the EPA.
- High elongation at break, the film follows edges and corners instead of splitting at the first pallet corner.
- High mechanical strength, the wrap holds during in-plant moves.
- Pink-transparent colouring, contents stay visible and the material is immediately identified as ESD packaging in the warehouse.
- Fits the EP0703022 hand wrapping tool, which allows low-fatigue work without an improvised roll holder.

Brand	A1-ESD
Version	PE hand stretch film, dissipative
Colour	pink-transparent
Properties	high elongation at break, high mechanical strength
Handling	manual, fits hand wrapping tool EP0703022
eCl@ss	35030501

APPLICATION

Securing carton stacks and small load carriers, bundling assemblies and housing parts, fixing picked orders on trolleys and pallets inside the ESD protected area. For occasional wrapping and for packing stations without a machine, hand stretch film is the leaner choice compared with a machine film.
