DESCRIPTION

The Treston spacer bar is used to stabilise the bench. It is necessary when the bench consists only of legs and a bench top, bracing the structure across its width.

TECHNICAL DATA

- **Type:** spacer bar (Workshop)
- **Suitable for bench width:** 1500-2250 mm
- **Function:** bench stabilisation
- **Weight:** 3.77 kg

APPLICATION

Recommended for wide Treston Workshop benches without an undercarriage to increase torsional rigidity and stability.
