DESCRIPTION

For ESD-safe gripping of small components such as mini MELFs, diodes, and resistors, these form F tweezers combine a long, flat tip 2.3 mm wide with a dissipative ESD coating rated 10^6 to 10^9 ohm.

ADVANTAGES

- Dissipative ESD coating with 10^6 to 10^9 ohm surface resistance protects against electrostatic discharge
- Long, flat tip 2.3 mm wide for precise gripping of small components, form F
- Antimagnetic SA stainless steel protects sensitive components from magnetic fields
- Matt polished surface works smooth and glare-free at 125 mm overall length
