- blades burnished, glare-free even in high light
- blade length 14-22 mm
- measures 130 x 80 x 5 mm
- weight 17 g

AREA OF APPLICATION

The watchmaker screwdriver set is not only for the watchmaker one of the most important tools, but also in the electrical sector, for the model maker, or in the Do-it-yourself and hobbyist needs. The fine screwdriver with smooth-running rotating cap facilitates precise repeated screwing, turning, tightening or loosening due to its special ease of movement. Moreover, this product is almost nickel free and 100% made in Germany.

TECHNICAL DESCRIPTION

INSTRUCTIONS: High humidity or touching the blades with your fingers (sweat) causes flash rust. Therefore, the blades should always be kept dry or rubbed with a drop of oil for storage. If such rust forms on the blade, it can be easily removed, with a slight ground.

GENERAL INFORMATION

Very fine screwdrivers are also known as micro screwdrivers. BERNSTEIN screwdrivers have a precision blade and a sturdy aluminum handle. These watchmaker's screwdrivers or precision mechanics screwdrivers are often supplied as an accessory to devices for opening, setting or readjusting.
