TECHNICAL DATA

 HS-Code **82054000**

 Weight **0.004 kg**

DESCRIPTION

Anyone who has to grip screws down to a tenth of a millimeter reaches for this fine screwdriver with a slotted blade 2.3 x 0.40 mm and a blade length of 17 mm. The hard precision blade made of quality tool steel grips the miniature screw directly and transmits force without slipping.

ADVANTAGES

- Precision blade 2.3 mm for a clean fit in small slotted screws
- Blade thickness 0.40 mm for a play-free grip without tilting
- Ergonomic plastic handle with colored ring rotating cap for fast size recognition
- Handle diameter of 9 mm rests calmly in the hand even during long work sessions
- Burnished surface stays glare-free even under strong light
- 100 percent made in Germany and nickel-free

TECHNICAL DATA

Feature	Value
Application	precision screw connections in fine mechanics
Handle	ergonomic plastic handle with colored ring rotating cap
Blade Length	17 mm
Blade Diameter	2.5 mm
Handle Diameter	9 mm
Blade Width	2.3 mm
Blade Thickness	0.40 mm

Feature	Value
Blade Material	molybdenum-vanadium steel, hardened and burnished
Surface	glare-free even in high light
Overall Length	104 mm
Weight	4 g

APPLICATION

The classic watchmaker's screwdriver is essential not only for watchmakers but also for precision mechanics, model makers, and electronics technicians. The rotating cap makes repeated screwing, turning, tightening, and loosening easier thanks to its particular ease of movement. High humidity or direct contact with the burnished blade can cause flash rust, so the blade should be kept dry or lightly oiled for longer storage.
