DESCRIPTION

Assembling and reworking the finest SMD components calls for tweezers that grip securely even at a 30° angle, without damaging sensitive parts. The ESD SMD tweezers 5-069-13 bring a 115 mm long, serrated tip in antimagnetic stainless steel for exactly that.

BENEFITS

- Oblique, 30° upwards angled, very fine long tips for access in flat assemblies.
- Serrated tip surface in form 5abb-Z holds mini MELFs, diodes, and resistors without slipping.
- Antimagnetic stainless steel SA prevents interference with sensitive components.
- Matt polished, glare-free surface eases precise work under the microscope.
- Dissipative ESD coating between 10^6 and 10^9 ohm protects electrostatically sensitive components.
