DESCRIPTION

The Wiha TORX PLUS bit features a reduced, over-tightened profile whose reinforced cross-section transfers approximately 25% more torque than a standard TORX profile. This reduces profile wear and extends service life, which is particularly noticeable in series fastening applications in trade and industry. The bit is made from high-quality chrome-vanadium steel and is through-hardened.

BENEFITS

- Reinforced profile cross-section transfers approx. 25% more torque than a TORX profile
- Reduced, over-tightened profile protects both screw and bit
- Chrome-vanadium steel, through-hardened - long service life
- 1/4-inch shank C6.3 fits all common bit holders and drivers
- Standards-compliant: DIN 3126, ISO 1173, Style C6.3
