DESCRIPTION

PH2 is the most widely used Phillips profile in industrial and trade assembly. At 150 mm, this Bit Professional reaches screws deep inside housings, through guide sleeves or along extended setting paths where a standard 25 mm bit cannot. Through-hardened chrome-vanadium steel sustains the tip geometry through intensive use.

BENEFITS

- 150 mm length for recessed PH2 screws and extended reach applications
- High-grade chrome-vanadium steel, through hardened - high durability and wear resistance
- 1/4" E6.3 drive, DIN 3126 / ISO 1173 - fits all standard bit holders
- Meets DIN ISO 8764-1 for verified profile accuracy
