DESCRIPTION

Y-shaped screws have a thread-to-head angle different from 90°, requiring a bit geometry matched precisely to that profile. The Wiha Y bit 41624 with Phillips PH1 and 50 mm length provides that match, delivering reliable torque transfer without damaging the screw recess under high loads.

BENEFITS

- Compatible with power tools, impact and percussion screwdrivers
- Fluorescent colour coating: bits easy to find in the dark using UV light
- Screw-shape selection concept: only the screw profile determines bit choice
