

Gear set replacement gears for clean-o-point tip cleaner - Elvo 3018

Item no. WL11884

Manufacturer Elvo

When the clean-o-point drive slips or the cleaning rollers stop turning, worn gears are usually the cause. This set of original Elvo replacement gears restores the drive between motor and rollers and is fitted as a complete set. Intended for repair of Elvo clean-o-point soldering tip cleaners.

TECHNICAL DATA

Weight 0.1 kg

DESCRIPTION

The gear drive transmits motor torque to the cleaning rollers inside the clean-o-point. Solder dust and continuous duty wear the teeth, which shows up as rattling, slipping or stalled rollers. Set Elvo 3018 replaces the affected gears together so the tooth flanks carry evenly again.

BENEFITS

- Original Elvo 3018 replacement gears supplied as a complete set for clean-o-point
- Replacing all gears together avoids uneven wear in the gearbox
- Restores even roller rotation and therefore the cleaning performance
- Manufactured to exact fit, assembled without adjustment work on the housing
- Weight 0.1 kg, inexpensive to hold as a maintenance reserve

TECHNICAL DATA

Item number	WL11884
Model	3018
Manufacturer	ELVO
Manufacturer item number	3018
Version	Replacement gears as a set
Weight	0.1 kg

APPLICATIONS

Repair and overhaul of soldering tip cleaners in electronics manufacturing, rework benches and test areas, in particular on units running multiple shifts with a high cleaning frequency.

COMPATIBILITY AND SCOPE OF DELIVERY

Suitable for Elvo clean-o-point (COP) soldering tip cleaners. Scope of delivery: one gear set 3018. Gearbox shafts and the solder container are available separately as a spare parts set, as are brushes, sponge rollers, front plate and housing.
