

FE adapter kit for fume extraction for TB3220 and Pulsmatic - JBC 555334

Item no. WL13101

Manufacturer JBC

FE adapter kit for solder fume extraction directly at the iron of the JBC CLASSIC series TB3220 and Pulsmatic. Captures fume at the source and routes it to the filter unit for clean air at the workstation.

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
Country of Manufacture	Spain
HS-Code	85159080900
Weight	0.1 kg

DESCRIPTION

The FE adapter kit upgrades the irons of the JBC CLASSIC series TB3220 and Pulsmatic to solder fume extraction right at the tip. Fume is captured where it is created and carried through the extraction hose to the filter unit before it reaches the breathing zone.

BENEFITS

- Extraction at source, directly at the TB3220 and Pulsmatic iron
- Complete kit to retrofit the CLASSIC series
- Protects the operator from flux fume at the workstation
- Compatible with the FE hoses and filters of the JBC FE system

TECHNICAL DATA

Item no.	WL13101
Manufacturer item no.	0555334
Manufacturer	JBC
Series	CLASSIC
Suitable for	TB3220, Pulsmatic
Order unit	set

APPLICATIONS

Solder fume extraction at the manual soldering station with JBC CLASSIC series TB3220 and Pulsmatic in manufacturing, repair and laboratory work.

COMPATIBILITY AND SCOPE OF DELIVERY

For JBC TB3220 and Pulsmatic of the CLASSIC series. Supplied as a complete set. Matching spares: FE silicone hose 6/4 mm and cable clip.

Made in Spain.
