

Soldering tip special shape for QFP/PLCC, 4,5 x 1,8 mm for JBC T245 - JBC C245009

Item no. WL13223

Manufacturer JBC

JBC soldering tip, special shape for QFP/PLCC (special shape for soldering QFP and PLCC components), C245 series for the T245 iron, article C245009. The integrated heater gives a very short heat-up time and precise temperature control.

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
Country of Manufacture	Spain
HS-Code	85159080900
Serie	C245
Weight	0.1 kg

STANDARDS & COMPLIANCE

ESD safe

DESCRIPTION

The JBC C245009 is a soldering tip from the C245 series for the T245 iron (formerly AD-2245). With a special shape for QFP/PLCC geometry and dimensions of 4,5 x 1,8 mm it is suited for QFP and PLCC components. The heater sits inside the cartridge, so the tip reaches working temperature within seconds.

BENEFITS

- Special shape for qfp/plcc geometry with 4,5 x 1,8 mm dimensions for QFP and PLCC components
- Heater integrated in the cartridge for seconds heat-up and constant temperature
- Total length 100 mm, tip length 7.5 mm
- Fits all JBC T245 handpieces and stations with sleep and hibernation modes

TECHNICAL DATA

Item number	WL13223
Manufacturer	JBC
Manufacturer item number	C245009

Model	C245-009
Tip / product series	C245
Suitable iron / handpiece	T245
Integrated heater	yes
Tip dimensions	4.5 x 1.8 mm
Tip application	for QFP/PLCC
Tip length	7.5 mm
Total tip length	100 mm
Tip alignment	straight
Dimensions with packaging (LxWxH)	110 x 12 x 12 mm
Order unit	piece

APPLICATIONS

PCB repair and rework, professional electronics manufacturing and laboratory use. Soldering of QFP and PLCC components.

COMPATIBILITY AND SCOPE OF DELIVERY

Compatible with the JBC T245 handpiece and all JBC stations that accept this iron. Stored and changed in the JBC C245 cartridge stand. Scope of delivery: 1 piece. ESD safe, RoHS compliant, made in Spain.
