

Sieve reflector 34 mm for Ghibli hot air blower - Leister 107308

Item no. WL13586

Manufacturer Leister

The 50B3 sieve reflector spreads the hot air stream of the Leister Ghibli evenly across the workpiece instead of concentrating it on one point. Its 34 mm connection diameter fits the blower directly and delivers gentle, area-wide heat. Typical uses are shrinking, activating and preheating sensitive surfaces.

TECHNICAL DATA

Weight

0.1 kg

DESCRIPTION

Large-area heating with the Leister Ghibli calls for an even heat pattern rather than a concentrated jet. The 50B3 sieve reflector with 34 mm connection diameter and 50 mm width distributes hot air through a mesh screen and prevents local overheating of the workpiece.

BENEFITS

- Even heat distribution across the full 50 mm reflector width
- 34 mm connection diameter matched to the Leister Ghibli
- Mesh screen breaks up the air jet and avoids scorch marks on the surface
- All-metal construction for continuous use on hot air blowers
- Tool-free push-fit mounting for fast changeovers between operations

TECHNICAL DATA

Item number	WL13586
Model	50B3
Manufacturer	Leister
Manufacturer item number	107.308
Type	Sieve reflector
Diameter D	34 mm

Width W	50 mm
Weight	0.1 kg

APPLICATIONS

Area preheating and drying, activating adhesives and coatings, shrinking films and tubing, and warming thermoplastics before forming. The right choice wherever a tube nozzle would overheat the material locally.

COMPATIBILITY AND SCOPE OF DELIVERY

Fits the Leister Ghibli hot air blower with 34 mm mount. Scope of delivery: one 50B3 sieve reflector.
