

Soldering station power supply 40 W 230 V with display MX-500P-21 - Metcal

Item no. WL13693

Manufacturer Metcal

Repeatable joints need a stable power source. This Metcal power supply delivers 40 W at 230 V and shows the operating state on a display. It is the base unit for running a Metcal hand piece at the soldering bench.

TECHNICAL DATA

Weight 0.1 kg

DESCRIPTION

At a soldering bench the power unit decides how fast the tip returns to working temperature after each joint. This Metcal power supply, model MX-500P-21, works with 40 W at 230 V and makes the operating state visible on a display.

BENEFITS

- 40 W output for continuous operation of one hand piece
- Display for direct monitoring of the operating state
- 230 V mains connection, no extra transformer needed
- Compact base unit that takes little bench space
