

Soldering tip chisel-shaped bent, one side wettable, 3.2 x 1.2 mm, 370 °C - Weller PT MX7

Item no. WL17026

Manufacturer Weller

Magnastat soldering tip PT MX7 from the PT series, chisel-shaped, 3.2 x 1.2 mm, with a self-regulating tip temperature of 370 °C. 6.9 mm diameter, fits Weller soldering irons TCP 12, TCP 24, TCP 42, TCPS, FE 50M.

TECHNICAL DATA

Ausführungsklasse **ESD (antistatic)**

Country of Manufacture **Germany**

HS-Code **85159080900**

Weight **0.1 kg**

DESCRIPTION

The PT MX7 soldering tip from the Weller PT series works on the Magnastat principle and holds the tip temperature self-regulating at 370 °C. With its chisel-shaped geometry and 3.2 x 1.2 mm it is made for precise manual and rework soldering.

BENEFITS

- Magnastat principle self-regulates the tip temperature to 370 °C without external electronics.
- Bent tip with one-side wetting for clear sight and access in tight spots.
- Chisel-shaped geometry with 3.2 x 1.2 mm for focused heat transfer at the joint.
- Replacement tip for the Weller soldering irons TCP 12, TCP 24, TCP 42, TCPS, FE 50M.

TECHNICAL DATA

Model PT MX7

Manufacturer Weller

Manufacturer item no. T0054130799

Tip series PT

Tip shape chisel-shaped

Alignment bent

Wetting one side wettable

Tip width	3.2 mm
Tip thickness	1.2 mm
Tip diameter	6.9 mm
Tip temperature	370 °C
Suitable handpiece	TCP 12, TCP 24, TCP 42, TCPS, FE 50M

APPLICATIONS

Suitable for soldering on PCBs, connectors and through-hole components, as well as for repair and service work in electronics production and the workshop.

COMPATIBILITY

Fits the Weller Magnastat soldering irons TCP 12, TCP 24, TCP 42, TCPS, FE 50M. The fixed tip temperature of 370 °C is maintained by the Magnastat switch inside the iron.

Made in Germany.
