DESCRIPTION

Fine joints on densely populated assemblies need a tip that reaches temperature fast and holds it under load. This bent, pencil-point C245 series soldering tip with a 0.4 mm diameter has an integrated heater and fits the JBC T245 soldering iron (formerly AD-2245). In the stand the station activates sleep and hibernation mode, extending tip life.

BENEFITS

- Integrated heater right at the tip for rapid temperature recovery
- 0.4 mm pencil-point, bent head for good visibility and access
- Tip length 8 mm, total length 120 mm for precise work
- Sleep and hibernation in the stand extends service life
