DESCRIPTION

To keep the pump and vacuum unit of JBC desoldering systems reliably protected from extracted solder residue, the filter discs must be replaced regularly. The JBC 781046 set holds 10 replacement discs and maintains suction performance over the service cycle.

BENEFITS

- 10 filter discs per pack for planned replacement
- protects the pump and vacuum unit from extracted solder residue
- maintains the suction performance of the desoldering system
- direct replacement, no tool needed to change

TECHNICAL DATA

Model	0781046
Item number	WL19866
Manufacturer item number	0781046
Manufacturer	JBC
Type	filter disc for air filter
Content	10 pieces
Order unit	pack

APPLICATIONS

Scheduled maintenance replacement of the air filters on JBC desoldering systems to maintain suction and protect the vacuum unit.
