

Flange 80 mm polypropylene for extraction cabinet white - Alsident 4-80-13-5

Item no. WL19911

Manufacturer Alsident

Smaller extraction cabinets running a moderate air volume are matched by an 80 mm connection. This white polypropylene flange links the cabinet wall to the exhaust duct and is supplied fitted. Polypropylene stays resistant in long-term contact with solvent and acid vapours.

TECHNICAL DATA

Colour	White
Weight	0.1 kg

DESCRIPTION

Small extraction cabinets at single workstations move little air and therefore need an 80 mm connection rather than a large duct. The Alsident 4-80-13-5 is the matching polypropylene flange through which the exhaust duct is attached to the cabinet.

BENEFITS

- Connection diameter of 80 mm suited to small extraction cabinets and slim ducting
- Polypropylene is chemically resistant and will not corrode even with humid exhaust air
- Price includes assembly, the flange is delivered ready fitted
- White version blends into bright laboratory and production environments

TECHNICAL DATA

Item number	WL19911
Model	4-80-13-5
Manufacturer	Alsident
Manufacturer item number	4-80-13-5
Diameter	80 mm
Material	Polypropylene
Colour	White

Assembly	Included in the price
Order unit	Piece
Weight	0.1 kg

APPLICATIONS

Exhaust connection on small extraction cabinets above soldering, bonding and cleaning stations, and on laboratory cabinets used for sample preparation and dispensing work.

COMPATIBILITY AND SCOPE OF DELIVERY

For Alsident extraction cabinets with an 80 mm connection. Supplied as one flange in white, fitted. Cabinet, ducting and fan are ordered separately.
