

Filter mat F7 fine dust prefilter for LRA and LAS series 150 to 250 - ULT 02.0.010

Item no. WL20466

Manufacturer ULT

Where fine fume aerosols dominate, a coarse dust mat is not enough as a first stage. This F7 class filter mat separates considerably finer than an M5 mat and noticeably relieves the downstream HEPA filter. It fits the ULT LRA 150 to 250 and the LAS 150, 220 and 250.

TECHNICAL DATA

Weight 0.1 kg

DESCRIPTION

In processes with heavy fume the main filter saturates sooner than the maintenance plan allows. This F7 class prefilter mat already retains fine dust and so extends the service life of the H13 stage in the 150 to 250 series units.

BENEFITS

- F7 filter class, finer separation than an M5 mat in the same mounting position
- Relieves the HEPA filter, which can then stay in the unit longer
- Fits LRA 150, LRA 200, LRA 220, LRA 250 and LAS 150, 220 and 250
- Available singly and interchangeable with the M5 version 02.0.009
- Tool-free change during running production

TECHNICAL DATA

Item number	WL20466
Model	02.0.010
Manufacturer	ULT
Manufacturer item number	02.0.010
Order unit	piece
Filter type	prefilter
Filter class	F7

Device series	LRA 150, LRA 200, LRA 220, LRA 250
Further units	LAS 150, LAS 220, LAS 250

APPLICATIONS

Recommended for heavily used soldering benches, for selective and rework processes with strong fume and wherever the main filter has been saturating too early. Where the load is mostly coarse dust, the M5 mat 02.0.009 is the more economical choice.

COMPATIBILITY AND SCOPE OF DELIVERY

Intended for the ULT extraction units LRA 150, 200, 220 and 250 and LAS 150, 220 and 250. Supplied as one F7 filter mat, main and adsorption filters are available separately.
