

Expanded metal filter prefilter for series 1000 and SRA 2000 - ULT 02.0.017

Item no. WL20577

Manufacturer ULT

Sparks, glowing particles and coarse swarf have no place in the filter pack. This expanded metal filter acts as a mechanical first stage in the ULT LRA 1000, ACD 1000, AOD 1000 and ASD 1000. The metal mesh can be cleaned and does not have to be replaced at every service interval.

TECHNICAL DATA

Weight 0.1 kg

DESCRIPTION

Where a process throws sparks or coarse particles, a metallic first stage protects everything behind it. This expanded metal filter serves as the prefilter in the 1000 series extraction units and holds coarse matter out of the airflow before it reaches a mat or cassette.

BENEFITS

- Expanded metal construction, unaffected by hot particles and mechanical load
- Prefilter stage for LRA 1000, ACD 1000, AOD 1000 and ASD 1000
- Cleanable, which keeps consumable costs below those of a fleece mat
- Shields the downstream fleece and HEPA filters from coarse load
- Genuine ULT part with an exact frame fit in the filter compartment

TECHNICAL DATA

Item number	WL20577
Model	02.0.017
Manufacturer	ULT
Manufacturer item number	02.0.017
Order unit	piece
Filter type	prefilter
Design	expanded metal
Device series	ACD 1000, AOD 1000, ASD 1000, LRA 1000

APPLICATIONS

Extraction on processes with coarse dust or swarf, at grinding, cutting and laser stations and on bonding or potting processes with a high particle load. During servicing the mesh is knocked out or washed and put back in place.

COMPATIBILITY AND SCOPE OF DELIVERY

Fits the ULT extraction units LRA 1000, ACD 1000, AOD 1000 and ASD 1000. Supplied as one expanded metal filter, the downstream filter mats and cassettes of the series are ordered separately.
