

Flange 100 mm for extraction cabinet polypropylene white - Alsident 4-100-13-5

Item no. WL20667

Manufacturer Alsident

An extraction cabinet needs a properly fitted connection so that suction performance is not lost at the transition. This 100 mm flange in white polypropylene links the cabinet to the extraction arm or the ducting. Assembly is included in the price, the part is fitted to the cabinet at the factory.

TECHNICAL DATA

Colour	White
Weight	0.1 kg

DESCRIPTION

Connecting an Alsident extraction cabinet to an extraction arm or a duct system requires a matching flange. The flange 4-100-13-5 provides that transition with a diameter of 100 mm and is made of polypropylene, the same material as the cabinet housing.

BENEFITS

- Connection diameter of 100 mm for extraction arms and ducting of this nominal size
- Polypropylene, chemically resistant and matched to the cabinet material
- White finish blends into light coloured cabinets
- Price includes assembly, no additional fitting work is required

TECHNICAL DATA

Item number	WL20667
Model	4-100-13-5
Manufacturer	Alsident
Manufacturer item number	4-100-13-5
Diameter	100 mm
Material	Polypropylene (PP)
Colour	White

Scope	Price includes assembly
Order unit	Piece
Weight	0.1 kg

APPLICATIONS

Connection of extraction cabinets to extraction arms or fixed ducting in electronics manufacturing, laboratories, dental technology and cleanroom support areas, wherever vapours, dust or solder fume are captured at source.

COMPATIBILITY AND SCOPE OF DELIVERY

Fits Alsident extraction cabinets and extraction arms or duct systems with a 100 mm connection diameter. Scope of delivery: one flange 4-100-13-5, assembly included in the price.
