

Flange 75 mm for extraction cabinet polypropylene red - Alsident 4-75-13-4

Item no. WL20672

Manufacturer Alsident

Small extraction cabinets at single workstations usually run in nominal size 75 mm. This red polypropylene flange with a 75 mm diameter links the cabinet to the extraction arm or ducting and keeps the flow cross section continuous. Assembly is included in the price.

TECHNICAL DATA

Colour	Red
Weight	0.1 kg

DESCRIPTION

At single workstations with a moderate volume flow the extraction cabinet is connected in nominal size 75 mm. The flange 4-75-13-4 provides that transition, is made of polypropylene and comes in red.

BENEFITS

- Connection diameter of 75 mm to suit series 75 extraction arms and ducting
- Polypropylene, chemically resistant and identical to the cabinet material
- Red colour identifies individual extraction circuits or workstations
- Price includes assembly, no extra effort at commissioning

TECHNICAL DATA

Item number	WL20672
Model	4-75-13-4
Manufacturer	Alsident
Manufacturer item number	4-75-13-4
Diameter	75 mm
Material	Polypropylene (PP)
Colour	Red

Scope	Price includes assembly
Order unit	Piece
Weight	0.1 kg

APPLICATIONS

Connection of extraction cabinets to extraction arms or fixed ducting of 75 mm nominal size at soldering and repair benches, in laboratories, dental technology and at dispensing and cleaning stations.

COMPATIBILITY AND SCOPE OF DELIVERY

Fits Alsident extraction cabinets and extraction arms or duct systems with a 75 mm connection diameter. Scope of delivery: one flange 4-75-13-4, assembly included in the price.
