- Developed as part of the ERGO™ process
- The burnished tip ensures greater accuracy and good grip in the screw
- For work on live workpieces, up to 1000 V
- Three-component handle for maximum ease of use, soft material with ribbed surface for better grip and greater power transmission
- Maximum comfort and minimum stress thanks to the ergonomic design
- The correct blade can be easily identified by the colour marking and the symbol on the end of the handle
- The cylindrical shaft with a small diameter facilitates quick loosening and tightening of the screws
- The length of the handle ensures that the fingers are automatically positioned correctly for fast turning and precise control
- Integrated suspension eye
- Flat side parts prevent rolling away

- High performance steel alloy, the insulation layer is sprayed directly onto the blade
- Individually tested and manufactured according to IEC 60900, tested in a water bath at 10000 V
