

Soldering tip round, angled, 1 mm, with integrated heater - JBC C245-904

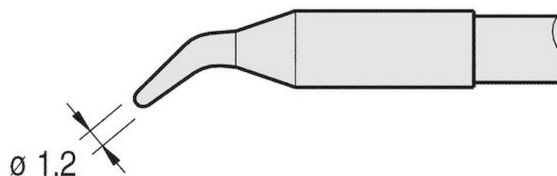

Item no. WL22455

Manufacturer JBC

Angled 1 mm round tip from the C245 series for the JBC T245 soldering iron. The integrated heating cartridge reaches working temperature within seconds and keeps it stable even on thermally demanding joints.

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
Country of Manufacture	Spain
HS-Code	85159080900
Serie	C245
Weight	0.1 kg

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

The C245-904 is an angled round tip with a 1 mm diameter for the JBC T245 soldering iron (formerly AD-2245). Because the heater is built directly into the cartridge, the heat source sits right at the tip, giving short heat-up times and even heat transfer for general soldering work.

BENEFITS

- Tip and heater combined in one cartridge for fast thermal recovery at the joint
- Angled alignment for better access to obstructed solder joints
- Round 1 mm tip diameter for versatile general-purpose soldering
- Sleep and standby mode via the station holder reduces wear and power use
- Tool-free tip change in seconds on the T245 handpiece

TECHNICAL DATA

Item no.	WL22455
Model	C245-904
Manufacturer no.	C245904

Page 1/2

Tip series	C245
Tip shape	round
Tip alignment	angled
Tip diameter	1 mm
Tip length	9.5 mm
Overall length	100 mm
Integrated heater	yes
Compatible handpiece	T245

APPLICATIONS

Suited to general PCB soldering where a side or angled approach to the joint improves visibility and reach.

COMPATIBILITY AND SCOPE OF DELIVERY

Fits the JBC T245 soldering iron. Supplied as a single piece (1 tip).

ESD-safe working to IEC 61340-5-1. Origin: Spain.
