

Soldering tip conical, bent, 1 mm, for AP130-A - JBC C130-403

Item no. WL22819

Manufacturer JBC

Bent C130 series soldering tip with integrated heater, conical tip, 1 mm diameter, overall length 120 mm. Fits the AP130-A soldering iron with solder wire feed; aligned precisely to the joint via the anti-rotation feature on the handpiece.

TECHNICAL DATA

Ausführungsklasse	ESD (antistatic)
Certification	IEC 61340-5-1
Country of Manufacture	Spain
HS-Code	85159080900
Series	C130
Weight	0.1 kg

STANDARDS & COMPLIANCE

ESD safe IEC 61340-5-1

DESCRIPTION

The JBC C130-403 soldering tip from the C130 series carries heat through an integrated heater straight to the conical tip, 1 mm diameter and holds the set temperature even during short soldering cycles. The bent geometry matches the AP130-A soldering iron with solder wire feed and keeps the joint in clear view.

BENEFITS

- Integrated heater for fast warm-up and steady heat transfer at the joint
- Conical tip, 1 mm diameter for precise work on fine pads and leads
- Bent tip with 9.5 mm tip length, matched to the solder wire position
- Aligned exactly via the anti-rotation feature on the handpiece
- Plugs directly onto the AP130-A soldering iron with solder wire feed, tool-free change

TECHNICAL DATA

Item no.	WL22819
Manufacturer item no.	C130403

Model	C130-403
Manufacturer	JBC
Tip series	C130
Tip shape	conical
Tip alignment	bent
soldering tip diameter	1 mm
Tip length	9.5 mm
Overall length	120 mm
Integrated heater	yes
Suitable handpiece	AP130-A
Dimensions with packaging (LxWxH)	127 mm x 31 mm x 31 mm
Order unit	piece

APPLICATIONS

Hand and rework soldering on printed circuit boards, in particular with automatic solder wire feed and on hard to reach or angled joints.

COMPATIBILITY AND SCOPE OF DELIVERY

Fits AP130-A. Supplied as a single tip (C130403). Supports ESD-safe work together with JBC stations and handpieces to IEC 61340-5-1.

JBC, manufacturer item no. C130403, made in Spain. CE, RoHS.
